International Journal of Fundamental & Applied Sciences

EDITORIAL

Dear Scientists and academicians,

We the editorial team are happy to publish October-December 2012 issue of IJFAS "International Journal of Fundamental & Applied Science". In this issue, we are up bringing natural chemistry, pharmaceutical science and biotechnological manuscripts collectively. We are very glad to see the response shown by the scientific community to uplift the values of the journal. Indexing in INDEX COPERNICUS and ZOOLOGICAL RECORDS (ISI)

show the journal is growing in its different phases, even starving for the real science. Our aim is to make IJFAS one of the most cited journals in the area of Basic Sciences to applied sciences to grow attention of scientific world therefore, we would like the scientific community to cite/refer more often the articles published in IJFAS which would further enhance the growth of the journal. Such as, Singh R et al¹, 2012 is attaining a good response from the antioxidant and food nutritionists. We would also like to point out the fact that scientific quality of the articles published in IJFAS is accelerating in each issue.

Meanwhile, online publishing has been both accused for tapering science and much admired for lengthening it, but which is right? Go Green or other way. If you would like to comment on any of the topics covered, kindly anticipate your feedback to our mail id, ijfas@gmail.com.

It will be published as Letter to Editor in IJFAS.

We anticipate your sincere and positive participation in the upcoming issues of IJFAS.
